

## Miniature LaMancha Pairings

Miniature LaMancha Pairings	Date	Availability	Notes
Hefty Goat Holler Storm X Sunspring's WBJ Churro	Due 2/13	Grade All doelings retained	I've gone back and forth on what buck to breed Storm to. I finally settled on Churro to see if I can get a doeling with that amazing production behind both of them. Polled won't hurt my feelings, either. I expect he will add some angularity as well.
Hefty Goat Holler Rhea X GoGo's FaSu Frontier Ted	Due 2/8	Grade 1st doeling retained 2nd doeling \$300	Rhea is a fourth freshener. She's got a LOT of body capacity, is long and wide throughout with an easy-to-milk udder. She is lacking attachments, however, and that is where Ted comes in!
GoGo's LoSt Pixie Dust X Nehi Minis Tumbling Jupiter	Due 2/8	F3 Experimental 1st doeling retained 2nd doeling \$300	Pixie is a second freshener. Long girl with a long rump. Her first freshener udder was very soft though her teats were a bit short. She had a promising fore on her first freshening, too. I am hoping this cross keeps the general appearance of either of these animals while adding bone from Jupiter.
OzarkJewels Be My Baby Sarah (LM) X Nehi Minis Tumbling Jupiter	Due 2/16	Grade 1st doeling retained 2nd doeling \$300	Baby is a second freshener. Her udder was incredibly correct and easy to milk. I'd like to see a straighter topline and some increased body depth and muscling. My goal is to start a new mini line with Jupiter, and I think he and Baby will cross well.
Hefty Goat Holler Pearl X Sunspring's WBJ Churro	Due 2/8	Grade Doeling reservations available \$275	Pearl is a first freshener. Pearl is solid. Thick, long, and growthy. I am pairing her with Churro to add some angularity while hopefully maintaining that wonderful production from her dam line and pairing it with his.
Hefty Goat Holler Beryl X GoGo's FaSu Frontier Ted	Due 2/12	Grade Doelings reservations available \$275	Beryl is a first freshener. She's a smaller copy of her dam, Storm. It looks like her teats are going to be larger so I am pairing her with Ted to maybe add a more cylindrical shape to them and perhaps increase rump length and levelness.
